Gratte Brothers

PwCs headquarters building, was awarded the UK's first BREEAM 'outstanding' rating for a commercial building. Packed with energy saving features and building services integration, including dimmable lighting with open DALI networks throughout, automatic emergency light monitoring and reporting. Staff have control over their light level by web browser. Scene setting in private dining suites linked via web control to the AV system.

Prolojik supplied controls for the 500,000 sq ft fit-out for PwC at 7 More London. Working with Gratte Brothers, Prolojik provide a comprehensive control system with Lon/DALI LCMs, DALI multi-sensors, DALI scene set switches, local user PC control, AV interfacing and emergency monitoring.

The system uses Lon/IP Area Controllers and communicates with the Prolojik Perspective graphical headend and the BMS system via the buildings IP network.
