Prolojik completed this 315,00 Square foot fit out for Asset Management Company Schroders at 1 London wall place.

Prolojik used some of its most high tech lighting control equipment in this huge office space. "Modular" Plug in LCMs were mainly used for the LED luminaires they were partnered with our brand new "Proxima" location based (Plus much more) sensors and IP Area controllers.

For the more specialist areas of this fit out we used a DMX interface for the auditorium along with 8 Scene setting plates and AV integration for the meeting rooms to create the perfect lighting configurations.

The system provides fire alarm, generator and building management system integration.

Perspective graphical software provides full central control with user friendly operation of all system features and emergency light monitoring.

## Key Features:

- "Modular" Plug in LCM system, fully addressable
- "Proxima" Location based sensors
- DMX Interface for auditorium
- Scene plates and AV Integration
- IP Lighting area controllers
- Presence detection and daylight linking
- BMS system interfaces

## Prolojik Products Utilised:

- "Modular" PL531e Plug in LCM's
- PL434 Hard-wired LCM's
- "Proxima" PS462 DALI multi-sensors
- PN541 IP Area controller
- PN380 DMX interface
- PN350 AV Integration
- BACnet/LonWorks gateway
- Perspective graphical software
