

DALI to DMX Interface

The PN385 offers a DALI to DMX interface, allowing control over a set of DMX fixtures.

Prolojik control systems can be extended with the addition of a **PN385** DALI to DMX controller which provides DMX colour changing control of lighting.

The controller converts network commands from scene plates, touchscreens, switches, sensors or timed schedules to specialist and feature lighting.

Key Features

DALI to DMX Interface

DIN rail mounted enclosure

DMX512

DMX Output ESD Protection – 12kV

Specification

Inputs

DALI
Screw Terminals – 2pin

Output

DMX512
Screw Terminals – 3pin
Protection against continuous connection to 425VAC

Dimensions

355mm x 260mm x 80mm (L x W x H)

Mains Input

230V AC

Conformity and Standards

Generic emission: EN 50 081 part 1
Generic immunity: EN 50 082 part 1

Environment

Storage
Temperature: -10°C - +50°C
Humidity: 0% - 80% non-condensing

In Use
Temperature: 0°C - +40°C
Humidity: 0% - 80% non-condensing
